DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5 and 8-27, drawn to an electronic component classified in class 439, subclass 66.
 - II. Claims 6-7 and 28-33, drawn to a test head assembly and a method of for testing an integrated circuit/wafer, classified in class 324, subclass 754.
2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. In the group I contains claims directed to the following patentably distinct species of the claimed invention:
 - figures 1C and 2A-2C (1st embodiment);
 - figures 2D and 3 (2nd embodiment);
 - figures 2F and 5 (3rd embodiment);
 - figure 4 (4th embodiment);
 - figures 4A and 4B (5th embodiment);
 - figures 6A and 6B (6th embodiment);
 - figure 7 (7th embodiment);

figure 8 (8th embodiment);
figures 11A and 11B (9th embodiment);
figures 12A and 12B (10th embodiment);
figure 13 (11th embodiment);
figures 14A and 14B (12th embodiment);
figure 15A and 15B (13th embodiment); and
figure 16A and 16B (14th embodiment).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
